Statement Regarding COVID-19 Vaccinations

Due to the recent surge of both the Delta and Omicron Covid variants we are happy to be able to provide vaccines and boosters to our members and anyone in need before the impending holiday. That being said, vaccination is not mandated and while we support vaccination, we also support an alternative like frequent on-site Covid-19 testing and health care protocols such as hand washing, sanitization, and wearing PPE which are appropriate alternative measures.

We stand behind our members' individual rights to do what is best for their situation, whether a personal choice or a medical or religious exemption.
