SEA Statement Regarding the Incident Northern NH Correctional Facility

Today we learned about a serious incident at one of our state facilities. We are deeply concerned and troubled by what we know to be an assault on three of our dedicated members working at the Northern NH Correctional Facility. Our thoughts are with those injured staff members, and we wish them a speedy recovery. This incident underscores the urgent need for action.

It is unacceptable that the facility continues to be staffed at or below critical minimum levels, forcing staff to work exorbitant amounts of overtime. The safety and well-being of both staff and inmates are at risk due to these ongoing issues.

The SEA has been tirelessly advocating for over a decade to address these concerns, and it's clear that the Department is still in a very dangerous place. We call on the authorities to take immediate and effective measures to rectify this situation and ensure a safer environment for all.

We stand with our members and will continue to push for the necessary changes to protect the welfare of everyone involved.

In Solidarity,

Rich Gulla

President, NH State Employees' Association
